## Ultra Filtration Technology

Blue Mount's superior UF (Ultra Filtration) technology allows Online purification at high flow rate.

It comes equipped with a 0.01 micron pore diameter UF membrane which removes harmful micro-organisms such as bacteria, viruses and cysts while allowing essential minerals to pass.

It is a combination of sediment cartridge, which filters suspended impurities like fine sand and clay; activated carbon cartridge and silver impregnated carbon, removing all chemical impurities like chlorine, as well as color and odour from water thus making water pure to drink.

## Silver Impregnated Carbon

Blue Mount introduces Silver Impregnated Carbon filter with UF filtration as disinfectant, more effective in controlling growth of bacteria and other micro-organisms.

Due to its antimicrobial and antiseptic properties silver impregnated carbon is used as absorbent in domestic water purifier. It removes bacteria & viruses, enhances the taste of water & makes drinking water crystal clear.
